

GRACE ZAWADI WAIRIMU

Software Developer · Nairobi, Kenya

gracezawadi24@gmail.com · github.com/Chenzie2 · linkedin.com/in/grace-zawadi-3988a2301 · gracezawadi.vercel.app

PROFILE

Full-stack developer building responsive, production-ready web applications with React, Flask, and Python. Passionate about clean UI, intuitive UX, and writing code that solves real problems. Currently expanding into TypeScript, PostgreSQL, and FastAPI.

TECHNICAL SKILLS

Frontend: React, JavaScript, HTML5, CSS3, Tailwind CSS, Redux Toolkit, Responsive Design

Backend: Python, Flask, REST APIs, Node.js fundamentals

Data & Analytics: Pandas, NumPy, Matplotlib, Seaborn, Google Colab, Jupyter Notebook

Tools: Git, GitHub, VS Code, Figma, Postman

PROJECTS

Ticksty: Event Ticketing & Management Platform *Oct 2025*

Team Project · 6 Contributors

- Implemented JWT authentication, role-based access control, and real-time ticket availability tracking.
- Integrated MPESA STK Push for secure checkout, supporting attendee, organizer, and admin dashboards.

Coursify: Full-Stack Learning Platform *Jul 2025*

Team Lead

- Led the frontend team building a role-based course management platform inspired by Coursera.
- Implemented protected routes, JWT auth flows, and form validation using Formik & Yup.

Vacation Planner: Destination Discovery App *May 2025*

Personal Project

- Built a trip planning app with destination filtering, search, and persistent favorites using localStorage.
- Consumed a local json-server REST API to simulate full CRUD functionality.

Expense Tracker: Personal Finance App *Apr 2025*

Personal Project

- Developed a KES expense tracker with instant search, smart sorting, and automatic currency formatting.

Password Strength & Vulnerability Analysis *Feb 2026*

Data Analysis Project

- Analysed a Kaggle dataset of real passwords to identify structural patterns behind weak credentials.
- Engineered features (length, character composition (digit ratios) and visualised findings with Seaborn/Matplotlib and produced actionable recommendations.

Kenya's Fiscal Landscape Analysis (2000-2021) *Feb 2026*

Data Analysis Project

- Integrated public debt, interest payment, and GDP datasets to engineer Effective Interest Rate metrics.
- Benchmarked Kenya's Debt-to-GDP ratio against the EAC 60% sustainability threshold using time-series visualization.

EXPERIENCE

Data & Research Assistant *Feb 2026 - Present*

FarmBizAfrica · Nairobi

- Conducted research on agricultural seed varieties and market trends, organizing findings in Excel.
- Tested the FarmBizAfrica platform and documented detailed usability feedback for the development team.

Cyber Threat Management Trainee *Jan 2026 - Mar 2026*

Cyber Shujaa · Nairobi

- Gained hands-on experience in threat management, vulnerability assessment, and risk mitigation.
- Collaborated with peers and industry experts to apply security principles to real-world scenarios.

EDUCATION

IBM SkillsBuild Cybersecurity Scholarship *Jan 2026 - Present*

IBM SkillsBuild

- Intensive program covering cybersecurity fundamentals, risk assessment, and IT security best practices.

Python for Data Analytics *Jan 2026 - Feb 2026*

KeDataLab, Kenya

- Hands-on training in data manipulation, analysis, and visualization using Pandas, NumPy, and Matplotlib.

Software Engineering Certificate *Feb 2025 - Nov 2025*

Moringa School, Nairobi

- Full-stack development program: React, Flask, Python, responsive UI design, and Git workflows.

BSc Business Information Technology (on gap year) *Jan 2024 - Present*

Birmingham City University, UK

- Studying IT systems, business technology, and data management. Resuming Sept 2026.
- BCUIC Awards: Graduate+ Bronze, Academic Excellence, Engagement in Class, 100% Attendance.

Introduction to Cybersecurity *May 2022 - Sept 2022*

Zalego Academy, Nairobi

- Covered network security, threat identification, and safe computing practices. Earned Credly badges.

K.C.S.E Certificate *Jan 2018 - Apr 2022*

Alliance Girls' High School, Kikuyu

CERTIFICATIONS & TRAINING

- IBM SkillsBuild: Cybersecurity Fundamentals
- Moringa School: Software Engineering Certificate
- KeDataLab: Python for Data Analytics
- Zalego Academy: Cybersecurity Certificate
- Cisco Networking Academy: NDG Linux Unhatched, Packet Tracer Badge
- ScoreMaster: React Open-Source Contribution
